FOR EARLY-STAGE STARTUPS

# From complex idea to *dependable software.*

**The clarity of a CTO and the hands-on execution of a seasoned engineer—in one accountable partner.** Work directly with Amit Verma, from first product decisions through architecture, build, and production.

AI accelerates delivery. Twenty-three years of engineering experience guide the product decisions, architecture, and validation.

**Business intent** — What must change → **Product decisions** — What matters now → **Architecture + build** — How it becomes real → **Production** — What survives use

## Clarity

Shape the right product, the smallest valuable scope, and the decisions that deserve senior attention.

## Execution

Keep product thinking and implementation in the same hands. Ship a useful first release early, then let evidence guide what comes next.

## Confidence

Security, data integrity, observability, testing, maintainability, and future handover are considered from day one.

JUDGMENT BEHIND THE BUILD

### Enterprise depth. Startup-speed execution.

Capita · iNautix / BNY Mellon · Cordys
IIM Calcutta · NIT Warangal

**23+** YEARS ACROSS PRODUCTS, PLATFORMS, AND TEAMS

**75%** INFRASTRUCTURE TCO REDUCTION LED AT ENTERPRISE SCALE

**40%** DEVELOPMENT-COST REDUCTION THROUGH REUSE AND MODERNIZATION

**Vibe to Viable ↗** **Already built an MVP with AI?** Identify the security, data, and reliability risks, then fix what matters to prepare it for real users.

## Bring your idea or early prototype.

Let's identify the most useful next step.

Talk through your idea ↗

# Proof beneath *the interface.*

Real workflows turned into working products. Each example pairs the business change with the engineering decisions that make it dependable.

01 · AGENTIC AI WITH CONTROL

## SarasAI Cloud Labs

**Ad-hoc cloud lab authoring becomes a governed, human-reviewed workflow across AWS, Azure, and GCP.**

Natural-language objectives become reviewable lab packages and provisioning artifacts. A LangGraph workflow generates, verifies, and repairs infrastructure code, with approved service catalogues, learner access policies, LMS integration, lifecycle tracking, and controlled cleanup.

GENERATE → VERIFY → REPAIR → PROVISION

02 · GOVERNED MULTI-PARTY OPERATIONS

## Veltrix Global Connect

**Fragmented recruitment coordination brought into auditable employer-agency workflows.**

Verification, mandates, candidate collaboration, and finance closeout share one governed platform. Organization-scoped authorization, server-side masking, explicit state machines, and an append-only ledger protect access and financial integrity.

FASTAPI · NEXT.JS · POSTGRESQL · OPENAI · EVENTS · SSE · AZURE

03 · CONTEXTUAL AI FOR CAREER GROWTH

## Better Corporate Life

**Courses, guided reflection, accountability, and coach support connected in one career-development product.**

AI interactions draw on curated domain content, retrieved user context, and course progress. PostgreSQL/pgvector supports semantic retrieval; longitudinal analytics carry learning and reflection across sessions.
